

STRONGLY AGREE

1. A multicultural education curriculum should be in place in every school.

3. All learning programs should accommodate all children w/ special needs.

AGREE

5. All curriculum should be based on each individual child's current interests.

7. Media in general delivers fair & accurate accounts of events around the country.

8. The U.S. should discontinue relations w/ countries that engage in human rights violations.

DISAGREE

2. Families should not be expected to be involved in classroom activities.

4. Some extended family members may confuse children, so they should not have a voice in raising or educating the child.

STRONGLY DISAGREE

6. Diversity definitely includes race & culture, but doesn't include age, ability, or family make-up.

POINT OF VIEW

things that influence my thinking or pov:

- immigration from foreign country
- parents not fluent in English
- siblings w/ special needs
- multigenerational relationships
- selective media exposure
- religious background
- education in ECE
- job history in childcare education

I believe anyone has the ability to change their views, but everyone also probably feels strongly for their personal beliefs / biases at any given time. Exposure to religions, access to new education, media coverage on political affiliations, and social groups / communities can influence us to change our perspective.
